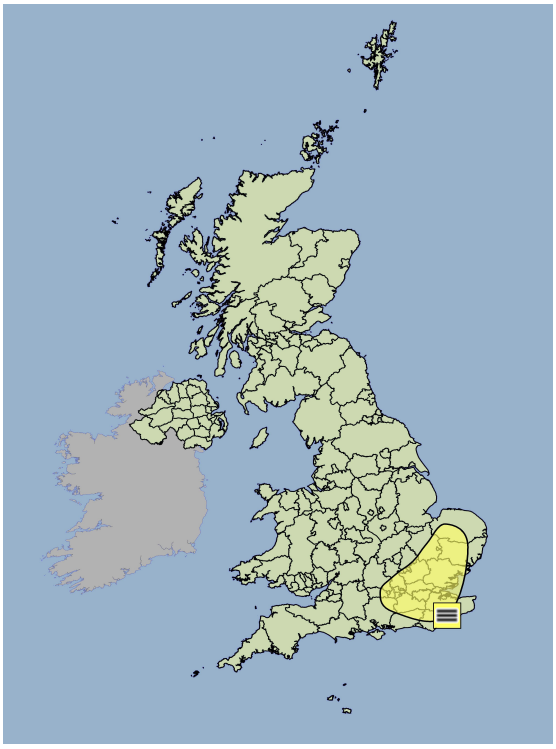
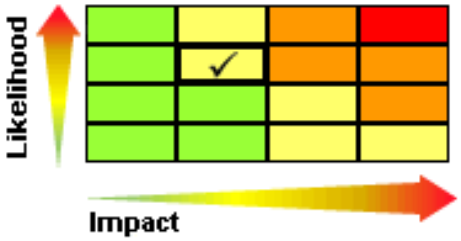
National Severe Weather Warning Service





Chief Forecasters Assessment
Light winds and clear skies across southeastern areas overnight will allow fog to redevelop, becoming more widespread, with visibility falling to around 50 metres in places. Later in the night, winds will increase slightly, lifting the fog from low ground and bringing hill fog to areas such as the Chilterns and the North and South Downs.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **18:00 on Wed, 11th Dec 2013** until **10:00 on Thu, 12th Dec 2013**

Fog patches will become more extensive again on Wednesday evening across parts of southeast England and East Anglia, becoming dense in places. Later in the night this will become more confined to higher ground across the region before clearing later on Thursday morning.

The public should be aware of the potential for disruption to travel.
